

# ETICA OBBLIGAZIONARIO BREVE TERMINE

## Class I

Fund classified as **Article 8 product that promotes, among other characteristics, environmental or social characteristics in accordance with the Sustainable Finance Disclosure Regulation (SFDR).**

A **Bond Fund** which aims to achieve a moderate increase in the capital invested. It is recommended for those who want to invest responsibly over a short-term time horizon with a low level of risk whilst complying with **environmental, social and governance (ESG) criteria.**

**Class I is reserved for Professional Investors.**

## Strengths

### Low volatility

Within the context of its monetary and bond investment policy, the fund invests primarily in short-term government securities in the euro area and also takes advantage of **opportunities arising from residual exposure to corporate issuers.**

### Simplicity

The fund has no entry, exit, switch and performance fees<sup>1</sup> and uses derivatives only to hedge portfolio risks.

### ESG analysis

As a result of our **proprietary methodology** of ESG analysis, **ESG EticApproach®** (registered trademark of Etica Sgr S.p.A.), the fund is characterised by a rigorous selection of countries and companies that are focused on environmental protection, respect for human rights and good corporate governance.

### Control of financial and non-financial risks

Through the proprietary risk metric, the **ESG Risk**, Etica Sgr supplements the calculation of financial risk with the measurement of risk from environmental, social and governance (ESG) factors that can have an impact on performance.

## Investment Policy

- The fund invests primarily in government securities issued or guaranteed by sovereign issuers or supranational and international organizations and, to a residual extent (maximum 10%), in corporate bond with **limited financial duration and a high credit rating**, belonging mainly to **EU markets**<sup>2</sup>.
- Investment in Emerging Market stocks and bonds is excluded.
- The fund is characterized by an **active management style**, which integrates issuer sustainability analysis with economic and financial analysis. The management team selects securities by taking the best opportunities to position on the short part of the rates curve. Overweights/underweights compared to the benchmark are possible.
- All financial instruments are selected based on an **accurate analysis of issuers' ESG (Environmental, Social and Governance) responsibility**. The fund does not invest in controversial countries and sectors (such as countries that use the death penalty or do not respect civil rights, or the oil, weapons, nuclear energy and gambling sectors) and issuers with **higher ESG scores** are then selected during the "positive selection" phase.
